PROFESSIONAL SUMMARY

Computer Science undergraduate and Software Developer with hands-on experience building functional mobile, desktop, and web applications Proficient in Flutter, React.js, and Next.js, with practical experience managing databases and automating workflows using n8n. Passionate about creating clean user interfaces, leading technical teams, and eager to bring my software engineering skills to an internship at Top Edge.

TECHNICAL EXPERTISE

- **Languages:** Dart, C++, SQL, JavaScript, HTML5, CSS3
- **Frameworks & Libraries:** Flutter (Mobile, Web, Desktop), React.js, Next.js, Flame Engine
- **Backend & Automation:** Supabase, Firebase, Google Cloud, Docker, n8n Workflow Automation
- **Design & Game Dev:** Canva (Flyers, Logos, Presentations, Posters for marketing/media), Figma, Unity Game Engine, Git/GitHub

PROFESSIONAL & LEADERSHIP EXPERIENCE

Freelance Software Developer | Independent Clients & Fiverr | 2024 – Present

- Build B2B SaaS web and mobile applications for retail transactions and warehouse management using Flutter, React.js, and Next.js.
- Automate backend data workflows and APIs using n8n, Docker, and Google Cloud, which significantly reduces manual administrative work for clients.
- Handle the entire development process from initial UI/UX mockups to final code deployment.

Executive Member, Development Team | COMPTECH Society, UET Taxila | Jan 2026 – Present

- Lead a technical development team within the university official tech society to collaborate, conceptualize, and build software projects.
- Organize and execute department wide technical events and competitions, facilitating the onboarding and mentorship of new society members.
- Design digital and print promotional materials including flyers, logos, presentations, and posters using Canva to drive engagement for tech events and handle the society's media marketing.

Class Representative | BSCS Cohort, UET Taxila | 2024 – Present

- Manage administrative communications for the computer science cohort, including drafting formal applications and coordinating daily between students and faculty[cite: 2].
- Program automated registration reminder systems to help students seamlessly participate in major academic events, technical workshops, and university initiatives[cite: 2].

TECHNICAL PROJECTS

Anas Space (Cross-Platform Gallery Sync) | *Flutter, Dart*

- Built a custom gallery application that syncs media files in real time between Windows, Android, and IOS devices.
- Designed the system to solve the problem of transferring media between different operating systems by keeping files automatically updated across all personal devices via a centralized database.

Blur (Swipe-Based Social App) | *Flutter, Dart, Supabase*

- Developed a social application where users discover profiles using a swipeable card interface.
- Used Supabase on the backend to handle secure user authentication, real-time matchmaking, and instant messaging.
- Built custom UI animations and gesture controls to ensure the app runs smoothly at 60fps on mobile devices.

WE Two (Chat & Collaboration App) | *Flutter, Supabase*

- Created a chat application that features a customizable profile theme engine inspired by Discord.
- Built a "Duo Sync" feature using Supabase that allows two users to collaborate on live to-do lists and share secure notes.

Dev Pulse (Developer Web Platform) | *React.js, Next.js, PostgreSQL*

- Architected a responsive web platform where developers can upload, share, and manage code snippets.
- Designed the relational database schema and set up secure user authentication loops.

Smart UET (Campus Navigation System) | *Flame Engine, C++*

- Built a routing system to help students navigate the university campus.
- Used Dijkstra's algorithm within the Flame engine to calculate and display the shortest possible walking paths.

2D Platformer Game (Passion Project) | *Unity Game Engine, C#*

- Designed and developed interactive levels for a custom 2D platformer as a hobby project to explore game design principles.
- Scripted basic player mechanics and level progression using the Unity game engine.

EDUCATION

Bachelor of Science in Computer Science (BSCS) | University of Engineering and Technology (UET), Taxila | 2024 – 2028

Intermediate in Computer Science | KIPS College | 2021 – 2023
